

The image shows the cover of a marble catalogue. It features a background of three overlapping panels of different marble types: a light-colored, speckled marble on the left, a medium-toned marble with wavy veins in the center, and a dark, veined marble on the right. The text is centered on the middle panel.

About Dereli Art

In Saraylar, Marmara, Derbent Maden Inc. began producing block marbles in 2019.

Dereli Family has been involved in the mining sector for three generations after beginning their mining operations in the 1940s. The Dereli Family's initial business venture on the Marmara Island began by providing the glass producers with dolomite from Saraylar. Dereli Family continues to conduct business on Marmara Island through Derbent Maden A. for block marble and Dereli Mermer Granit Maden A. for chipped calcite.

At Dereli, we believe we are very lucky to be gifted with such natural creations from nature.

But after marbles extraction, it is up to creativity and vision to what to make out of it. We teamed up with professional designers and architects to launch a series of use cases of Dereli's unique marble.

Classy

Honed marble changes a daily life space into a classy interior with the texture on itself.

1 Dereli Art Calacotta

2

2 Dereli Art Calacatta

Unique

Bookmatched marble as an unique way of owning an art piece from the nature.

Dynamic

Extraordinary example of the variational use of the stone. The stone has ribbed texture on itself, as an unique way to have a texture of the nature.

Also as an example of combining marble with different materials, we see the powerful rhythm feeling on the picture. Ribbed marble & wooden lamellas have that dynamic and classy feeling.

Calacatta

Minimalist

4 Dereli Art Calacatta

Perfect example of designed kitchen with different sized marble according to design itself. Also it is the most sustainable way of a having sterile space.

5

Cosy

Having an organic shaped ripped marble changes your bathroom into a classy and cosy room to spend some time in.
